

STEPS IN A TYPICAL CLOUD JOURNEY

STEP

BENEFIT

TYPICAL COURSES

Proof of Concept: Move a few non-mission-critical applications into the cloud

Learn about the cloud, pick the services and tools that the organization will use, build a Cloud Center of Excellence (CCoE) that sets standards on cloud usage

Introductory courses from the cloud vendor of choice, further architecture and administration courses from vendor

Lift-and-shift: Move existing applications to the cloud

Lessens the burden on on-premises data centers, increases scalability, increases high availability

Specific cloud vendor courses that cover the services used

Further embrace Agile and DevOps: Take advantage of automated operations in the cloud to simplify the adoption of DevOps

Increases the pace at which software is built and delivered, decreases downtime, reduces the amount of administration

Subjects include topics about company culture, processes and practices, and usage of specific tools

Optimize spend: look at cloud spend and ways to track and reduce it

Lowers the cost of cloud computing, improves the ability to track spending by app, dept, line of business

Courses on getting the best bang for your spend

Cloud Native: design new applications to take full advantage of the cloud

Simplifies developing, testing, updating, scaling and administrating applications

Courses on containers and Kubernetes, courses from cloud vendors on their Kubernetes offerings, cloud vendor courses on serverless offerings

Multicloud: Devise a strategy to use hybrid and multicloud architectures where appropriate

Runs workloads where they are cheapest, takes advantage of best-of-breed services from different cloud vendors, avoids vendor lock-in

Courses from other cloud vendors, courses on tools for multicloud architectures like OpenShift

About ExitCertified

ExitCertified, a Tech Data company, is a leading provider of vendor-approved technology training for IT professionals, enterprises and government agencies. An award-winning IT training company, ExitCertified delivers vendor-approved courses using engaging and interactive methods that ensure knowledge retention. ExitCertified's comprehensive customer care, which has earned an industry-best 97% satisfaction rating, includes a pre-course consultation, student contact with the trainer during class and follow-up contact after course completion to ensure learning success.
