Certified VMware Training | ExitCertified

Create better business outcomes with VMware training and certification. Let ExitCertified show you how.

As a VMware Authorized Training Center Partner, ExitCertified provides VMware education services to the North American region. We can guide you in your journey to build knowledge andexpertise with training, so you can leverage opportunities made possible by VMware technology.

Increase your business outcomes faster

VMware customers who invest in training recognize specific benefits from their VMware software, including accelerated proficiency, faster product adoption and increased return on investment. These benefits are even more evident when managed by VMware certified IT staff.

Learn VMware solutions your way

With ExitCertified you get access to VMware courseware in the way that best suits your needs – whether it's through in-person courses, virtual classroom or a private session at your location. Learn from award-winning instructors and acquire the skills to benefit your organization in a way that best fits your learning style.

Live Virtual - premium virtual training

Get an in-class experience, no matter where you are. With Live Virtual, you can attend a class from your home or office. Experience the course through lab environments, slides, whiteboard and/or lectures. Live Virtual also has two-way voice and video, putting you face to face with the instructor and other students so you can hear and ask questions as if you were sitting in the same room. We even send you a headset and webcam so you'll have everything you need.

ExitCertified's Flex Account makes training easier to budget and manage throughout the year.
You can buy the year's training in advance at pre-discounted prices with a Flex Account and allocate courses as needed throughout your organization. And because each course costs you less, you'll be getting more training from each year's budget, with fewer worries about unused training dollars. You can apply your Flex credits to VMware and other training offered through ExitCertified. Alternatively, if you hold VMware training credits, we will accept those towards the cost of your training.
