Enhance Agility and Efficiency in the Cloud

Discover the cloud's full potential with ExitCertified training

Across enterprise and government, the necessity of moving to the cloud is now fully accepted. And by now, your own organization's move to the cloud is probably well underway, if not complete. But wherever you are in your digital transformation, you're probably realizing that the cloud hasn't been the instant solution to *all* your challenges.

Whether you're using Amazon Web Services (AWS), Google Cloud or Microsoft Azure, you're probably facing obstacles you hadn't anticipated. You might be held back by skills gaps in your teams, or you might find there are bottlenecks in your process of bringing new applications to market. Whatever barriers you face, ExitCertified training can help eliminate them with vendor-certified training in all cloud technologies. It's time to bring more agility, efficiency and performance to your operations.

Start with our Learning Needs Analysis

ExitCertified understands that achieving expertise in the cloud takes more than just a course or two. Success in the cloud requires both technical skill and the embrace of a culture built on agility and collaboration, which is why we begin every customer relationship with a Learning Needs Analysis. We work with you to understand your organization's strategic objectives, strengths and weaknesses, and then create customized learning paths to close whatever skills gaps we've identified. Our Learning Needs Analysis is a three-step process:

Gather data about current skills

We start by interviewing your key stakeholders and technology leaders to learn about your current solutions stack, capabilities, priorities and goals.

Analyze the findings

Then, we compare our findings with the understanding we've gathered by working with dozens of customers whose challenges and goals are similar to yours.

Present a customized training plan

Finally, your dedicated ExitCertified program manager collaborates with our subject matter experts to create a flexible and scalable training plan that delivers the right instruction through the most appropriate formats.

ExitCertified®

To simplify administration, we can provide you with a dedicated portal that allows your employees to self-enroll in their approved courses. And to make the most of your budget, we offer pre-discounted pricing on a full year's training through the **ExitCertified Flex Account**.

Depend on our track record of success

ExitCertified offers courses in all major cloud platforms, languages, frameworks and cloud-native technologies. Technology leaders like AWS, VMware, Red Hat, IBM, Oracle and ForgeRock have recognized us with esteemed training awards over the years.

To learn how ExitCertified can help your business gain more power from the cloud, please schedule a complimentary call with one of our subject matter experts.

ABOUT EXITCERTIFIED

Since 2001, ExitCertified has been a trusted name in education, providing IT training and certifications from the brands you trust and delivering vendor-approved content unsurpassed in quality. By partnering with ExitCertified, you get to choose from more than 9,500 courses for 45 different technologies, with training delivered by award-winning and certified instructors.

Our flexible delivery formats are designed to fit the learning style of any student, which means classes can be completed either online — anywhere, anytime — or in person at your site or one of our many facilities. And we ensure the training never stops by offering complimentary support after your courses end. Contact ExitCertified today to start developing an IT training strategy that meets your organization's goals both today and in the future.
