# In the AWS Partner Network? Your ExitCertified Training Discounts Are Waiting

## Earn new AWS certifications sooner

As part of AWS Partner Network (APN), you're already enjoying a long list of benefits. You're among tens of thousands of AWS Partners around the world who are getting hands-on support from AWS in the building, marketing and selling of your AWS products and services. And now, there's an additional benefit: Thanks to support from the APN Partner Funding Program, your membership also includes significant discounts on AWS training from ExitCertified.

As AWS Training Partner of the Year, ExitCertified is uniquely equipped to help you achieve the next certification on your learning path. In the years since AWS launched, we've helped thousands of cloud professionals build their careers and lead their organizations to new success.

If your organization is looking for authorized instructor-led AWS training, these savings are too good to miss. For example, our Architecting on AWS course lists for $2,025 USD; for APN Partners, the price is just $550 USD. Delivery of training includes both our public schedule as well as private group training — many organizations take advantage of private group instructor-led training as part of this program to have an optimal impact on their enterprise.

Like all ExitCertified training, these courses are available in the format of your choice: in person, online or through the live, high-definition virtual classroom experience known as Live Virtual.

Seating at these discount prices is limited, so review the full course list and act now.

### Start with an AWS Learning Needs Analysis

To maximize the power and potential of AWS in your organization, find out whether you're eligible for an AWS Learning Needs Analysis.
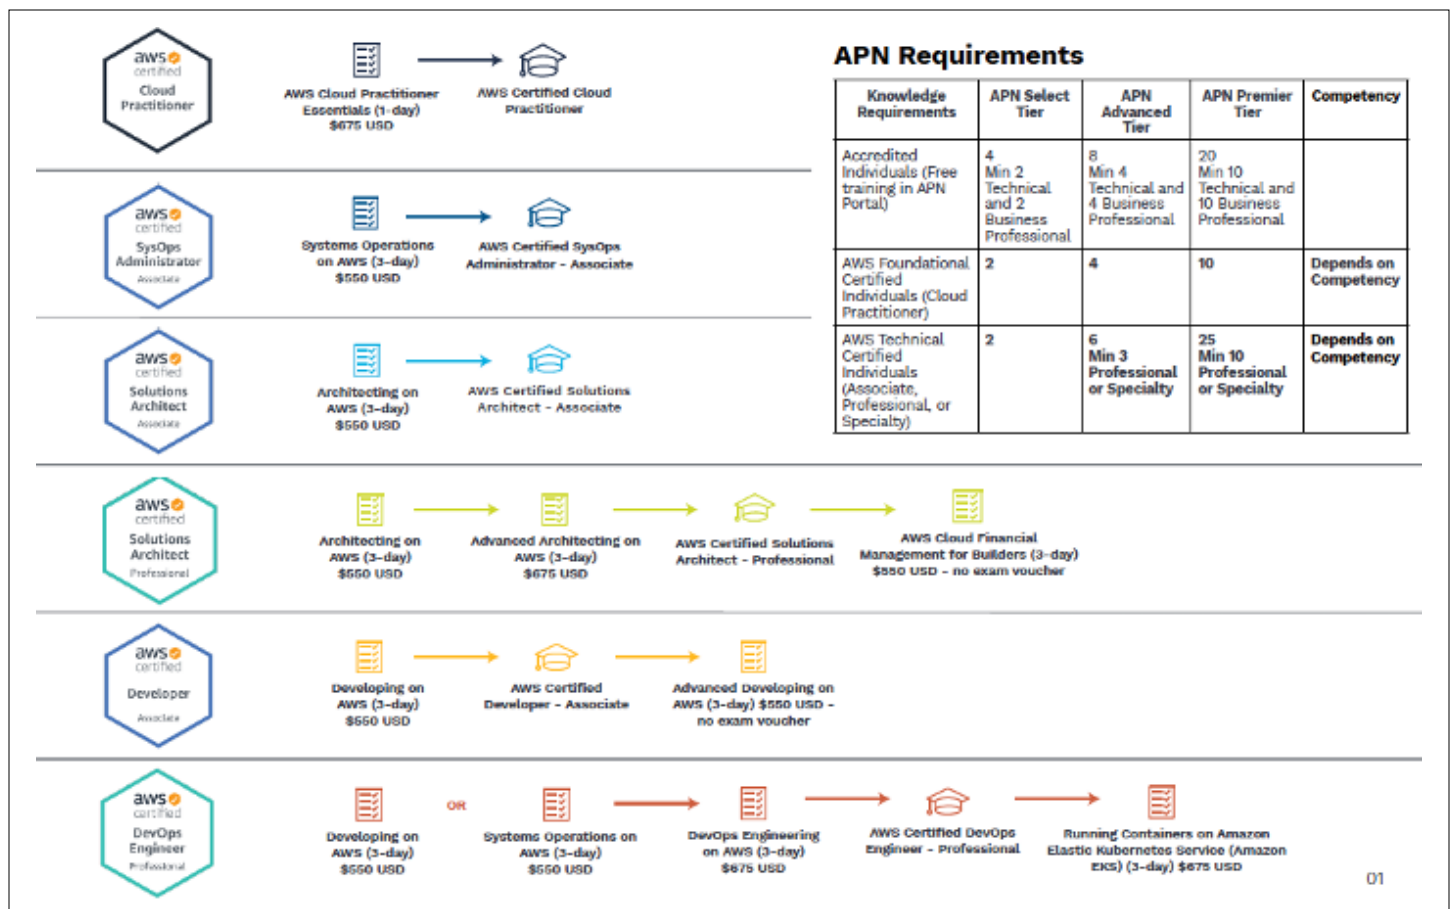

Each qualifying organization receives a complimentary assessment of current skills, a report on any skills gaps identified and a training plan that's customized to address the company's long-term strategic goals.
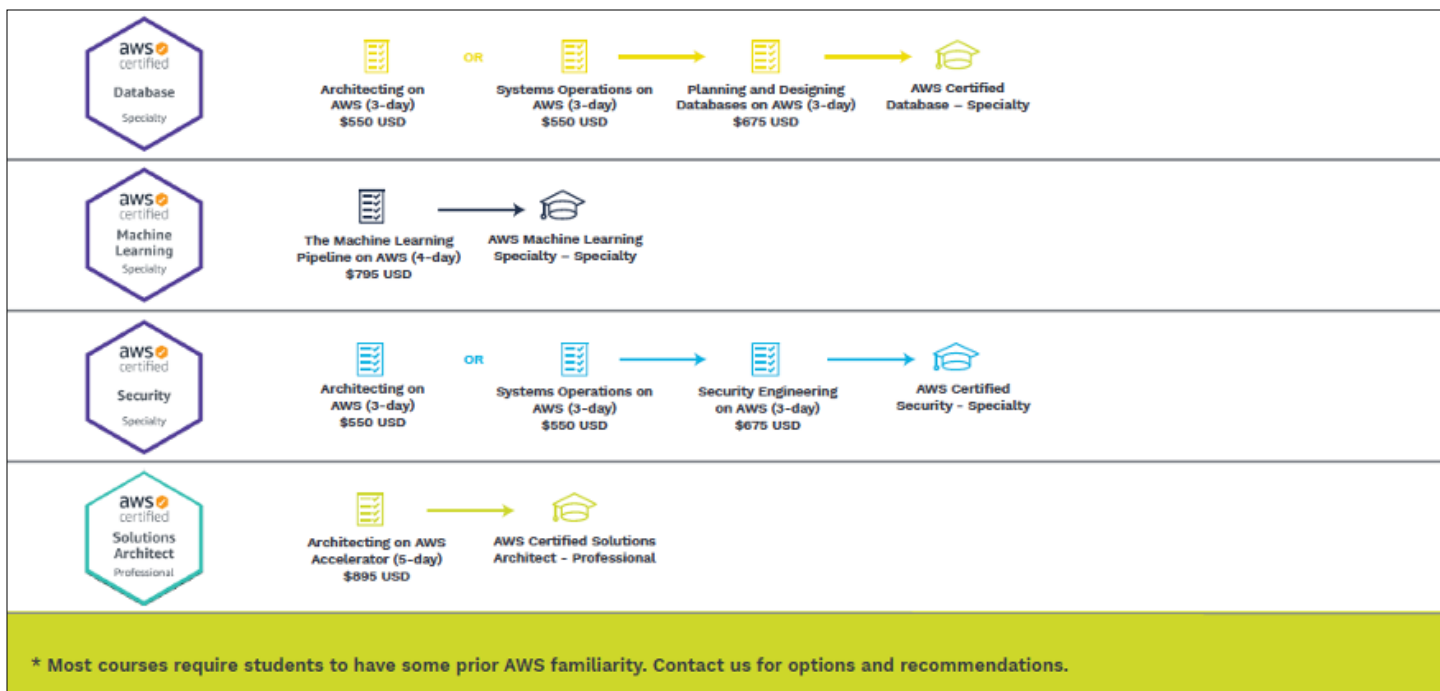

Our needs analysis is designed to give you a successful journey to the cloud based upon your business objectives and technical bench.

**Learn more about the AWS Learning Needs Analysis, and start planning your APN-subsidized training. Schedule a call with us here. This funding is also available for private events and the discount level is approximately 70%.**

AWS Authorized Training courses align nicely with the various AWS certifications required to achieve higher APN Consulting partners tiers and competencies. The 2021 requirements are laid out as follows:

| Knowledge Requirements | APN Select Tier | APN Advanced Tier | APN Premier Tier | Competency |
|---|---|---|---|---|
| Accredited Individuals (Free training in APN Portal) | 4 Min 2 Technical and 2 Business Professional | 8 Min 4 Technical and 4 Business Professional | 20 Min 10 Technical and 10 Business Professional | |
| AWS Foundational Certified Individuals (Cloud Practitioner) | 2 | 4 | 10 | Depends on Competency |
| AWS Technical Certified Individuals (Associate, Professional, or Specialty) | 2 | 6 Min 3 Professional or Specialty | 25 Min 10 Professional or Specialty | Depends on Competency |
