

Live Virtual Training

Take live IT training courses with ExitCertified from your home or office

In-class experience wherever you are

With Live Virtual, you can join an instructor-led class from your home or office with any type of device, using our fully interactive, two-way live video technology.

If you're online, you're ready to learn!

Get everything you need with your registration

Before classes begin, you'll receive a webcam, headset and course materials. All you have to do is download our Live Virtual software client to connect to class. Need help? Our Live Virtual team is available to support you every step of the way.

Learn from expert instructors & connect with classmates

Collaborate and interact in real-time with qualified instructors who have undergone a rigorous certification and evaluation process. With Live Virtual, you're part of the learning process as the instructors present, lecture and open the floor for discussion.

Communicate with classmates easily—listen and talk to classmates just as you would in the classroom. Plus, participate and interact on labs and in-class work with screen sharing.

Customer Testimonials

“At first, I was a bit skeptical about the quality of this course as I have not taken virtual training in the past... the quality was much better than anticipated and the video component engaged me with the instructor and other students. I would recommend Live Virtual!”

– Application Developer

“I have not been able to praise ExitCertified enough. This training experience was one of the best I’ve experienced; on par with SANS training. I supervise over 25 engineers, technicians and analysts—all of which are under mandatory CEU requirements. I will be suggesting they look into ExitCertified each and every time they have a training requirement to fulfill. Job well done. Thank you.”

– Manager, Information Technology Operations

“ExitCertified is one of, if not the best, technical training providers I have ever used. The Live Virtual online training facility was easy to use, high quality and provided a great platform for the delivery of training.”

– Cloud Architect
