

Veeam Training

Build your credentials with Veeam technical training

With over 365,000 customers worldwide, the Veeam Availability Platform is the leading solution for cloud data management — a solution that covers backup, disaster recovery and the intelligent administration of virtual, physical and multi-cloud infrastructures.

When it comes to upgrading your skills in Veeam, ExitCertified is your one-stop shop for superior training. As a Veeam Authorized Education Center for North America, all ExitCertified Veeam training comes directly from Veeam-certified instructors. This means that Veeam data center and network engineers gain the skills and confidence they need for the deployment, implementation and ongoing management of your Veeam solution.

Get award-winning training in a range of formats

ExitCertified brings you vendor-approved training in formats that fit your schedule, budget and preferred learning style. We offer traditional instructor-led training in classrooms across North America and in private groups at the location of your choice. Courses are also available online, and can be taken anywhere there's an internet connection. Plus, through our exclusive iMVP® platform, learners can join live classroom courses remotely in a high-definition online environment.

ExitCertified started building IT professionals' skills in 2001, and we've been growing in size and reputation ever since. Today, our award-winning training is available through over 9,500 authorized courses that cover more than two dozen leading brands.

Plan ahead and save

Looking to get the most value from your training budget? Set up an ExitCertified Flex Account and buy the year's training in advance at specially discounted prices. Then, you're free to allocate courses as needed throughout your organization. You can use your Flex credits for any of our training, including Veeam courses. An ExitCertified Flex Account is the smart way to save money, avoid waste and simplify administration. [Learn more](#)

Choose from a range of authorized courses

Veeam Certified Engineer (VMCE) V9

Managing or deploying Veeam Availability Suite? This three-day VCME training gives you a deep dive on all aspects of deployment, configuration and administration. The blend of theory and extensive hands-on labs will give you the confidence you need to manage data in a rapidly evolving technical and business environment.

[Learn more](#)

VMCE Certification

If your goal is a higher credential, this course will get you ready for the VMCE (V9) exam and, subsequently, recognition as a Veeam Certified Engineer. You can purchase this course with or without the exam voucher included. [Learn more](#)

Veeam Certified Engineer — Advanced (VMCE-A): Design and Optimization V1

This course is designed for those who've completed the three-day VMCE course and wish to prepare for the Veeam Certified Architect (VMCA) designation. Over two days, you'll gain the skills to size, scope, design, optimize, automate and troubleshoot your Veeam Availability Suite deployment. [Learn more](#)
