

Red Hat JBoss Application Administration II

Code:	AD348
Length:	4 days
URL:	View Online

Red Hat JBoss Application Administration II (AD348) prepares students to provision and manage Red Hat® JBoss® Enterprise Application Platform (JBoss EAP) in large-scale production environments. Intended for experienced administrators, this course provides a deeper understanding of how to work with JBoss EAP by taking a closer look at installation, clustering, deployments, scripting, management, messaging, and security with a view towards building on the skills established in Red Hat JBoss Application Administration I (AD248).

While focusing on automating tasks using the new command line interface (CLI) features of EAP 7, this course takes a deeper dive into provisioning JBoss EAP instances, live patching, clustering, and domain management through CLI scripting, custom coding, JBoss migrations, and a deeper dive into the security systems of JBoss EAP, including the management interface, securing resources such as JMS queues, implementing SSL for the web interface, RBAC, and network considerations. JBoss Application Administration II (AD348) also covers management, clustering, and tuning of of the ActiveMQ Artemis.

This course is based on JBoss EAP 7.

Skills Gained

- Installation of JBoss EAP and optional components
- Migration of JBoss EAP 6 to JBoss EAP 7
- Clustering with an emphasis on tuning
- Deployments to production and cloud environments
- Script with CLI
- JBoss EAP monitoring and resource management
- Messaging with an emphasis on clustering and tuning
- JBoss EAP and application security

Who Can Benefit

- Experienced system administrators responsible for deploying and administering JBoss Enterprise Application Platform 7 in large-scale production environments
- At least 2 years of experience as a JBoss EAP administrator
- IT professionals who have taken and passed Red Hat Certified Specialist in Enterprise Application Server Administration exam (EX248) and become a Red Hat Certified Specialist in Enterprise Application Server

Prerequisites

- It is recommended to take Red Hat JBoss Application Administration I (AD248) or have equivalent experience
- Be a Red Hat Certified Specialist in Enterprise Application Server Administration on Enterprise Application Platform 6 (or later) or have equivalent experience

Course Details

What's new in JBoss EAP 7?

- Describe the new features of JBoss EAP 7.

Migrate to JBoss EAP 7

- Explore strategies for migrating from JBoss EAP 6 to JBoss EAP 7.

Clustering

- Demonstrate clustering components, their configuration, and application to clustered architectures.

Deployment

- Learn to deploy an application in various types of production environments.

Scripting

- Learn to script various configuration and management scenarios using the CLI.

Management

- Use various tools to monitor and manage JBoss EAP 7.

Messaging

- Learn how to manage supported messaging systems.

Secure applications

- Configure security settings to restrict authorization and authentication to secure Java™ EE applications.

Secure JBoss EAP

- Configure security settings that include authentication, authorization, and the management console.

Comprehensive review

- Review tasks and concepts from Red Hat JBoss Application Administration II (AD348).
