### Skills Gained

- During the SAP Agile training, all aspects of Scrum will be covered both in theory and practice. You will learn about the Scrum values and principles and the way in which these contribute to the success of your project. By means of group exercises throughout the course you will gain practical knowledge and you will experience what it is like to work in a Scrum team. On top you will learn what specifically is needed to adapt SCRUM to your SAP project implementation.
- Prerequisites for using Agile for a SAP project implementation
- Get an understanding of the basic principles of Agile/ Scrum
- To understand how to successfully use Agile/Scrum for a SAP project implementation
- To become a qualified team member to ensure a successful SAP Agile/ project implementation
