

Oracle - PeopleSoft Purchasing/eProcurement Accelerated Rel 9.2

Code:	D82179GC20
Length:	5 days
URL:	View Online

This PeopleSoft Purchasing / eProcurement Accelerated Rel 9.2 training helps you become familiar with several advanced features, like creating and using requisitions and purchase orders in both Purchasing and eProcurement. Expert Oracle University instructors describe the key integration points with other PeopleSoft applications. This 9.2 course has been updated through Update Image 14.

Learn To:

- Create requisitions.
- Set up buyers, suppliers and items.
- Use approval workflow.
- Create basic and advanced requisitions.
- Setup eProcurement.
- Setup purchasing.

Benefits to You

Enrolling in this course will teach you how to use the major features of PeopleSoft eProcurement and PeopleSoft Purchasing, which you can apply and build on when you return to your own business environment. Learn the entire process of creating a requisition and dispatching a purchase order. Activities throughout the course provide stepwise examples that simulate scenarios in businesses like yours. You'll leave the class with a good overall understanding of the Purchasing and eProcurement applications, and you'll be better prepared to use the applications for your organization.

Requisition to Purchase Order Process Flow

This course will also help you develop knowledge about how the requisition to purchase order process flow is completed in both applications. This includes approval workflow, sourcing requisitions and managing purchase orders. This perspective helps you decide how to set up your system and also helps you create your business process practices. You'll also explore Direct Connect, as well as online supplier procurement.

Skills Gained

- Set up commonly used advanced features
