- Introduction to Apache Kudu
- Deploying and Scaling Cloudera Enterprise on Microsoft Azure (NEW!)
- Introduction to Cloudera Altus Director
- Introduction to Cloudera Navigator
- Introduction to Cloudera Manager
- Cloudera Essentials

### Subscription Details

This OnDemand offering provides you with a 365-day subscription that begins on the date of purchase. While the subscription is active, you will have unlimited access to the course training materials for all of the courses above which include recorded course lectures and demonstrations, assessment components, and hands-on exercise instructions. You will also receive 100 runtime hours of access to the online hands-on exercise environment accessible through web browser. You can start each exercise environment when you are ready to use it. You can stop or pause it when you are done for the time being, then return anytime to continue where you left off. The hours are available as a pool to be used as you wish across any or all of the courses. The exercise environments remain accessible until you have used the runtime hours or the subscription period ends, whichever occurs first.
