

# IBM Sterling B2B Integrator Advanced Business Process Modeling

---

<b>Code:</b>	6F100G
<b>Length:</b>	3 days
<b>URL:</b>	<a href="#">View Online</a>

---

The Sterling B2B Integrator Advanced Business Process Modeling course teaches you how to use message options, collect and move data, capture errors, send notifications, and update a database. You will learn about service configurations, the Assign Service, the Invoke Business Process Service, importing resources, and the lightweight JDBC Adapter. This course is a three day course.

## Skills Gained

After completing this course, students should be able to:

- Differentiate between services, adapters, and activities as they relate to building business processes.
- Configure a business process using the message output options.
- Apply the Assign Service along with DOM or Doc features in a business process.
- Create a business process to capture errors and to notify the user of an error.
- Create a business process to manage 997s.
- Create a business process to send data to different storage locations.
- Use the JDBC Adapter to create a business process to receive configuration values from a database

## Who Can Benefit

This course is designed for EDI End User, Web Developer, System Administrator, and Business Analyst.

## Prerequisites

This course assumes you have the following foundation knowledge:

- J2EE Framework and N-Tiered Architectures
