IBM - DOORS® Next Generation Author Fundamentals, V6.0.1

Code:	U5NSL55G
Length:	1 days
URL:	[View Online](#)

This course teaches the basics of authoring requirements using DOORS Next Generation (DNG).
DNG is a requirements management tool built on the IBM® Rational® Jazz™ platform. It provides a scalable solution for authoring, collaboration, and verification of requirements throughout an organization and supply chain. It enables users to capture, trace, analyze, and manage changes to requirements while maintaining compliance to regulations and standards.

Audience
Individuals responsible for authoring requirements using DNG including business analysts, systems engineers, software engineers, requirements engineers, requirements managers, and requirements team leaders.

Prerequisites
No previous DNG experience is required.

Key Topics

- Create and edit requirements.

- View and manage relevant requirement data with filters and views.

- Collaborate with comments and reviews.

- Organize requirements and requirement documents with folders and traceability links.

- Manage requirements with attributes and life cycle states.

- Track requirement status with Reports, dashboards and history.

Objectives
After completing this course, you will be able to use DNG to browse, view, create, modify, link, and organize requirement artifacts. You also will be able to use DNG to collaborate with team members and to track requirement status.

Course Details
- Overview - Overview of DNG artifacts, attributes, and relationships

- Log on to DNG - Log on to the DNG web client

- Artifact Page Basics - Project page overview and basic page configuration

- Filters - Create filters to display artifacts

- Configure Page Settings - Columns, grouping, page size, and tree view

- Views - Save artifact filter and page settings as view

- Navigating to Artifacts - Open artifacts, use breadcrumbs, find recently-viewed artifacts

- Artifact Content - Understand layout of artifact contents and sidebar information

- Comments - View, reply to, resolve, and create comments

- Links - Create links between artifacts, and use links explorer

- Create and Edit Artifacts - Create/edit artifacts, artifact templates, spell check

- Attributes - Set attribute values

- Module Navigation - Module structure and artifact access within a module

- Module Views - Configure and save module display settings

- Module Comments - Comments on base artifact vs. comments in context of module

- Module Links - Links on base artifact vs. links in context of module

- Module Add and Edit Artifacts - Create new and add existing artifacts to module

- Collection Basics - Open, filter, and compare collections

- Tags - Create and filter on tags

- Using Reviews - Review and approve artifacts

- History - View artifact history

- Dashboards - View and modify personal dashboard and mini dashboard
