

Red Hat OpenShift I: Containers & Kubernetes

Code:	DO180
Length:	4 days
URL:	View Online

Introduction to Containers, Kubernetes, and Red Hat OpenShift (DO180) introduces building and managing Docker containers for deployment on a Kubernetes cluster. This course helps students build core knowledge and skills in managing containers through hands-on experience with Docker, Kubernetes, and Red Hat® OpenShift Container Platform. The video classroom version is only available on Red Hat OpenShift Container Platform 3.5 and Red Hat Enterprise Linux 7.

Skills Gained

As a result of attending this class, students should be able to containerize simple software applications and services; deploy them with Docker, Kubernetes, and Red Hat OpenShift; test the containerized version; and troubleshoot issues with deployment. One of the key tenets of the DevOps movement is continuous integration and continuous deployment. Containers have become a key technology for the configuration and deployment of applications and microservices. Kubernetes is a container orchestration platform that provides foundational services in Red Hat OpenShift Container Platform.

- Understand container, Docker, and Red Hat OpenShift architecture.
- Create containerized services.
- Manage containers and container images.
- Create custom container images.
- Deploy containerized applications on Red Hat OpenShift.
- Deploy multi-container applications.

Who Can Benefit

- Developers who wish to containerize software applications
- Administrators who are new to container technology and container orchestration
- Architects who are considering using container technologies in software architectures

Prerequisites

- Be able to use a Linux terminal session and issue operating system commands · Have Red Hat Certified System Administrator (RHCSA) certification or equivalent experience

- Have experience with web application architectures and their corresponding technologies

Course Details

Course Introduction

- Introduce and review the course.

Get started with container technology

- Describe how software can run in containers orchestrated by Red Hat OpenShift Container Platform.

Create containerized services

- Provision a server using container technology.

Manage containers

- Manipulate pre-build container images to create and manage containerized services.

Manage container images

- Manage the life cycle of a container image from creation to deletion.

Create custom container images

- Design and code a Docker file to build a custom container image.

Deploy containerized applications on Red Hat OpenShift

- Deploy single container applications on Red Hat OpenShift Container Platform.

Deploy multi-container applications

- Deploy applications that are containerized using multiple container images.

Troubleshoot containerized applications

- Troubleshoot a containerized application deployed on Red Hat OpenShift.

Comprehensive review of Introduction to Container, Kubernetes, and Red Hat OpenShift

- Demonstrate how to containerize a software application, test it with Docker, and deploy it on a Red Hat OpenShift cluster.

Schedule (as of 4)

Date	Location	
Jan 31, 2022 - Feb 3, 2022	Virtual	Enroll
Feb 14, 2022 - Feb 17, 2022	Virtual	Enroll

Feb 28, 2022 - Mar 3, 2022	Virtual	Enroll
Mar 14, 2022 - Mar 17, 2022	Virtual	Enroll
Mar 28, 2022 - Mar 31, 2022	Virtual	Enroll
Apr 11, 2022 - Apr 14, 2022	Virtual	Enroll
Apr 25, 2022 - Apr 28, 2022	Virtual	Enroll
May 9, 2022 - May 12, 2022	Virtual	Enroll
May 23, 2022 - May 26, 2022	Virtual	Enroll
May 31, 2022 - Jun 3, 2022	Virtual	Enroll
Jun 13, 2022 - Jun 16, 2022	Virtual	Enroll
