

Oracle Supply Chain Management Cloud Learning Subscription

Code: SCM-CLS
URL: [View Online](#)

One year of access: This is an all digital solution for anyone on your team seeking training on Oracle Supply Chain Management (SCM) Cloud. With this learning subscription, you get 24/7 access for the duration of your subscription to a comprehensive set of training videos delivered by Oracle experts. Hands-on labs are included so you can practice what you learn. This training will help you understand the scope and flexibility of the features and capabilities found within the SCM Cloud suite of products, including: Innovation Management, Inventory Management, Manufacturing, Order Management, Product Development, Configurator Cloud, Configurator Modeling, Cost Management, Planning Central, and Product Hub. The implementation lessons within the subscription guide you through the process of configuring your SCM Cloud applications, augmented with proven 'best practices' and critical considerations during set-up. The administrator lessons show you how to perform administrative functions, manage cloud security, and perform ongoing maintenance. This learning subscription is periodically updated with new content and information, including features and product enhancements for new releases.

Skills Gained

- Access high definition training videos delivered by Oracle experts for 12 months
- Learn by job role
- Assess your knowledge through skills checks
- Practice with hands on labs
- Connect with Oracle through live training events from within your learning subscription
- Get answers to your questions from Oracle instructors
- Stay up-to-date on the new features with each product release
- Track your learning progress through dashboards

Who Can Benefit

- Cloud Functional team members, who perform product specific configuration
- Cloud Technical team members, who import and export data, perform analytics, create customizations and develop xtensions
- Cloud System Administrators
- Cloud Service Administrators

Course Details
