

Business Skills - Tableau Desktop Fundamentals

Code:	6476V
Length:	2 days
URL:	View Online

This course is designed to help you understand and apply important Tableau concepts and techniques to move from simple to complex visualizations. You will also learn how to combine them in interactive dashboards.

Skills Gained

Join an engaging hands-on learning environment, where you'll learn to:

- Connect to your data
- Edit and save a data source
- Understand Tableau terminology
- Use the Tableau interface / paradigm to effectively create powerful visualizations
- Create basic calculations including string manipulation, basic arithmetic calculations, custom aggregations and ratios, date math, logic statements and quick table calculations
- Use Reference Lines to highlight elements of your data.
- Use groups, bins, hierarchies, sorts, sets, and filters to create focused and effective visualizations
- Use Measure Name and Measure Value fields to create visualizations with multiple measures and dimensions.
- Handle changes in your data source such as field addition, deletion or name changes.
- Share your visualizations with others.
- Combine your visualizations into Interactive Dashboards and publish them to the web.

This course has a 50% hands-on labs to 50% lecture ratio with engaging instruction, demos, group discussions, labs, and project work.

Who Can Benefit

New Tableau users and those seeking a formal introduction to Tableau.
