

HDS - Network Fundamentals

Code: HDS-TCI2211
Length: 0 days
URL: [View Online](#)

This 5 day course provides an introduction to basic networking technologies and underlying principles supporting all file and content products. The course is designed to create a baseline of knowledge for students and to ensure these key knowledge areas are covered before attending File and Content Services (FCS) product training courses. It will offer an opportunity to acquire the knowledge required to fully comprehend the technology and principles taught in the product-focused courses. This course can be used as a fundamental level for all FCS product and solutions training and will also have relevance for Hitachi storage training.
