

i2 Analyst's Notebook - Advanced Course

Code:	U59I03G
Length:	3 days
URL:	View Online

This three-day course is designed for current i2 Analyst's Notebook (ANB) users that have a desire to advance their skills in advanced search and discovery functions. The focus is on advanced analytic techniques, importing, and understanding displayed data to pinpoint nodes of interest to answer questions.

This curriculum is designed to focus on the ANB program functionality regardless of data type analyzed.

Audience

This advanced course is specifically designed for Analysts working in Commercial and Government sectors.

Prerequisites

A basic understanding of and working knowledge of Windows and Microsoft Office Suites is useful. Attendees must also have completed the IBM i2 Analyst's Notebook Essentials (U59I02G) course or have equivalent experience. See also the highly recommended pre-class assessment.

COURSE OBJECTIVES

After completing this course, students will understand the following:

- Conduct detailed imports utilizing complex Data
- Conduct advance analysis utilizing Social Network Analysis (SNA), Filters and Histograms, Mapping, Conditional Formatting, and the Activity View tools
- The importance of Chart Properties in customizing the Analyst's Notebook environment
- Refresher on how to prepare products for presentation and dissemination
