

Oracle HCM Cloud: Recruiting

Code:	D103488GC10
Length:	1.5 days
URL:	View Online

Oracle Recruiting Cloud is designed to improve candidate quality and recruiting speed with a comprehensive recruiting solution. Administrators and implementers will learn about the recruiting life cycle and how to configure Recruiting key features for end users to source and hire candidates. Although this is not an end user course, some lessons include the end user experience to get familiar with some of the components in the system.

Learn To:

- Describe the basic functions of Oracle Recruiting Cloud and understand the end user experience.
- Administer both Policy and Administrator managed RAC databases.
- Manage Recruiting settings and security.
- Setup all Job Requisition-related components including templates and questionnaires.
- Configure the Candidate Selection Process.
- Configure the Career Site for candidate applications.
- Setup Job Offers and Campaign features as well as other administrative tasks.

Benefits to You

Improve candidate quality and recruiting speed by implementing a comprehensive recruiting solution. Configure powerful sourcing tools and a compelling candidate experience. Work with data already maintained in your Oracle HCM Cloud solution.

Career Site

You'll learn how to configure the look and feel of the centerpiece component of Recruiting, the candidate Career Site.

Candidate Selection Process

Use the easy-to-use drag and drop candidate selection tool to design a process flow that reflects your organization's process for hiring candidates.

Functional Setup Manager for Recruiting

Participants will work within the Functional Setup Manager as well as other HCM work areas to configure Recruiting.

A Live Virtual Class (LVC) is exclusively for registered students; unregistered individuals may not view an LVC at any time. Registered students must view the class from the country listed in the registration form. Unauthorized recording, copying, or transmission of LVC content may not be made.

Skills Gained

- Setup role-based user security related to Recruiting

- Manage settings and tasks related to Recruiting
- Develop content for the content library
- Create job requisition questions and questionnaires
- Configure job requisition templates
