

# ABAP Dialog Prog.Using EnjoySAP Controls

---

**Code:** BC412-v018  
**Length:** 5 days  
**URL:** [View Online](#)

---

## Skills Gained

- This course explains techniques for creating user dialogs that are maintained using the EnjoySAP Controls from ABAP programs.

## Who Can Benefit

- Developer
- Consultants

## Prerequisites

- Essential:
  - SAPTEC Fundamentals of SAP Web AS
  - BC400 ABAP Workbench Foundations
  - BC410 Developing Screen-Based User Dialogs
  - Knowledge in object-oriented programming (such as ABAP Objects)
- Recommended:
  - BC401 ABAP Objects

## Course Details

### Course Content

- Function and use of the Control Framework
- Integrate and call controls
- Data transport between ABAP programs and controls
- Change control attributes

- React to actions in the control
- Context menus
- Drag and drop functionality
- Combination of EnjoySAP Controls with other ABAP dialog forms
- Function scope and use of selected EnjoySAP Controls: HTML control, picture control, text edit control, ALV grid control, tree control

## Notes

- This course teaches you to use the EnjoySAP Controls from ABAP programs (using the classes delivered in the standard system). The ABAP Objects syntax elements that are necessary for this are also part of the course contents.
- The following are not part of the course: object-oriented modeling, general object-oriented programming and the control of external controls.

## Course based on software release

- SAP NETWEAVER 7.50 ECC608
