Oracle Siebel Learning Subscription

Code:	SBL-LS
URL:	View Online

With Siebel tutorial training modules, customers will learn how to install, configure, develop, and manage Siebel applications and clients. Explore Siebel architecture, how to configure and extend the underlying database, how to manage and monitor the components and parameters, how to tailor the user interface to a Siebel application, and more.

This learning subscription is built for Siebel customers who are actively using the product and want to extend their skills, as well as beginning users who need a solid grounding in Siebel functionality.

Topics:

- Siebel Fundamentals
- Siebel Technical Foundations
- Siebel Installation
- Siebel Tools
- Siebel Open UI Foundations
- Siebel Open UI Adv JavaScript API
- Siebel Business Analyst

Skills Gained

- Identify Seibel architecture components and their interrelationships
- Recognize best practices for Siebel implementation
- Install and configure a Siebel Enterprise, including Siebel Gateway Name Server, Siebel Server and Siebel Web Server Extension
- Install and configure Siebel clients, including the Siebel Developer Web client, sample database, and Siebel Tools
- Monitor and manage components and parameters
- Use the command-line server manager interface
- Tailor the user interface to a Siebel application
- Extend the Siebel database
- Configure tables and columns in the underlying database
- Configure drilldowns, pick lists and multi-value groups that enhance application usability
- Configure view-level access control, repository deployment, and user properties
