

Architecting on AWS Accelerator

Code:	AWS-ARCH-AX
Length:	5 days
URL:	View Online

Prerequisite Courses

Essentials for Getting Started - AWS Technical Essentials

[View Details](#)

This course combines Architecting on AWS and Advanced Architecting on AWS to offer a comprehensive, immersive course in cloud architecture. It covers all aspects of how to architect for the cloud over 5 days. You will learn how to design cloud architectures, starting small and working to large-scale enterprise level designs—and everything in between. Starting with the Well Architected Framework, you will be immersed in AWS services like compute, storage, database, networking, security, monitoring, automation, optimization, benefits of de-coupling applications and serverless, building for resilience, and understanding costs. Using hands-on labs, you will apply knowledge from lectures to gain skills.

Skills Gained

- Make architectural decisions based on AWS architectural principles and best practices
- Use AWS services to make your infrastructure scalable, reliable, and highly available
- Use AWS Managed Services to enable greater flexibility and resiliency in an infrastructure
- Make an AWS-based infrastructure more efficient to increase performance and reduce costs
- Use the Well Architected Framework to improve architectures with AWS solutions

Who Can Benefit

This course is intended for:

- Solutions Architects who are new to designing and building cloud architectures
- Data Center Architects who are migrating from on-premises environment to cloud architectures
- Other IT/cloud roles who want to understand how to design and build cloud architectures

Course Details

Delivery Method

This course is delivered through a mix of:

- Instructor-led Training & Discussion
- Hands-on Labs: This course allows you to apply new skills and knowledge through practical exercises including creating the data layer with Amazon S3, creating the compute (Amazon EC2) and database (Amazon RDS) layer, creating the network layer (Amazon VPC). Additional labs build on these layers to include high availability protection, scalability, and automation. Students experience going serverless and the benefits of Lambda/API Gateway. A final lab shows how to recover from a disaster to get the applications running again.

Course Outline

- The Well-Architected Framework
- Networking with AWS
- Core AWS concepts, knowledge, and services, including designing your environment and making your environment highly available
- Event-driven scaling
- Automation
- Decoupling
- Building for resilience
- Optimization
- Serverless designs
- Data security
- Advance networking topics
- Migration
- How to grow your architecture from small to extremely large

Related Certifications

Authorized training from ExitCertified is created and maintained by the vendor who also creates the certification exams. While it may not be a requirement of certification to attend a vendor-authorized training class, doing so will put you in the best position to successfully complete the related exams. Start training and begin working towards one of the following certifications today.

Architect

AWS Certified Solutions Architect - Associate
