

Oracle - PeopleSoft PeopleTools II ed1

Code:	PPLS-PPLT-II
Length:	5 days
URL:	View Online

This PeopleTools training introduces you to the PeopleSoft application development methodology. Dive deep into the PeopleSoft system architecture and the tool set used to develop new applications or customize existing PeopleSoft applications. Then, learn to create applications that incorporate parent-child data structures, views, multiple occurs levels, subrecords, subpages, tableset sharing, and selected fluid user interface features.

- Suitable for students using PeopleTools 8.54 or later.

Skills Gained

- Describe PeopleSoft application design and the technology behind this process
- Navigate PeopleSoft applications
- Describe the elements of the PeopleSoft Pure Internet Architecture
- Describe PeopleSoft data organization and validation
- Implement the eight steps of PeopleSoft application development
- Organize definitions into projects
- Design and build PeopleSoft applications, including building data structures and creating user interfaces
- Build classic and simple fluid PeopleSoft applications
- Demonstrate competence in PeopleSoft application development methodology
- Apply PeopleSoft design methodology in developing both classic and fluid applications.
- Create and use views as the basis for summary pages, search records, and prompt tables.
- Explain and implement TableSet sharing.
- Create records and pages that maintain parent-child relationships.
