

SAP Sales Cloud: SAP Commissions Implementation

Code:	C4H430-v094
Length:	4 days
URL:	View Online

- This course is designed to provide a fundamental understanding of implementation functionalities, features, rules and concepts of SAP Commissions. This course is targeted for Implementation consultants.
- In this course, you will learn about the most common implementation tasks you would need to perform within a project. The course includes an interactive workshop. During the workshop you will collaborate with the trainer to analyze and discuss a business case and learn about the best practice in implementing this business case. Participants will get access to SAP Commissions tenants for hands-on exercises during the training class.

Skills Gained

This course will prepare you to:

- Define the appropriate implementation tasks
- Define key Commissions terminology and concepts
- Explain Commissions workspaces
- Define Organization Data
- Demonstrate Plan Rules, Compensation Plans and Compensation Elements
- Manage various Administrative functions
- Demonstrate how to build a plan from start to finish in Commissions
- Identify implementation best practices

Who Can Benefit

- Implementation Consultant
- Application Consultant
