Cisco Firepower Threat Defense Overview Cisco Firepower NGFW Device Configuration Cisco Firepower NGFW Traffic Control Cisco Firepower Discovery Implementing Access Control Policies Security Intelligence File Control and Advanced Malware Protection Next-Generation Intrusion Prevention Systems Network Analysis Policies Detailed Analysis Techniques Cisco Firepower Platform Integration Alerting and Correlation Policies Performing System Administration Troubleshooting Cisco Firepower Lab Outline Initial Device Setup Device Management Implementing Network Discovery Implementing an Access Control Policy Implementing Security Intelligence File Control and Advanced Malware Protection Implementing NGIPS Customizing a Network Analysis Policy Detailed Analysis Configuring Cisco Firepower Platform Integration with Splunk Configuring Alerting and Event Correlation Performing System Administration Troubleshooting Cisco Firepower

### Skills Gained

After taking this course, you should be able to: Describe the components of Cisco Firepower Threat Defense and the managed device registration process Detail Next-Generation Firewalls (NGFW) traffic control and configure the Cisco Firepower system for network discovery Implement access control policies and describe access control policy advanced features Configure security intelligence features and the Advanced Malware Protection (AMP) for Networks implementation procedure for file control and advanced malware protection Implement and manage intrusion and network analysis policies for NGIPS inspection Describe and demonstrate the detailed analysis techniques and reporting features provided by the Cisco Firepower Management Center Integrate the Cisco Firepower Management Center with an external logging destination Describe and demonstrate the external alerting options available to Cisco Firepower Management Center and configure a correlation policy Describe key Cisco Firepower Management Center software update and user account management features Identify commonly misconfigured settings within the Cisco Firepower Management Center and use basic commands to troubleshoot a Cisco Firepower Threat Defense device

### Who Can Benefit

This course is designed for technical professionals who need to know how to deploy and manage a Cisco Firepower NGIPS in their network environment. Security administrators Security consultants Network administrators System engineers Technical support personnel Channel partners and resellers

### Prerequisites

To fully benefit from this course, you should have the following knowledge and skills: Technical understanding of TCP/IP networking and network architecture Basic familiarity with the concepts of Intrusion Detection Systems (IDS) and IPS
