This course is for individuals who seek an understanding of how to manage, optimise, and predict costs as you run workloads on AWS. You learn how to implement architectural best practices, explore cost optimisation strategies, and design patterns to help you architect cost-efficient solutions on AWS.

## Skills Gained

- Explain the cost of core AWS services
- Determine and estimate costs associated with current and future cloud workloads
- Use strategies and best practices to reduce AWS costs
- Use AWS tools to manage, monitor, alert, and optimise your AWS spend
- Apply strategies to monitor service costs and usage
- Implement governance standards, including resource tagging, account structure, provisioning, permissions, and access

## Who Can Benefit

- Solutions architects
- Developers

- Cost-optimisation leads
- System administrators
- Cloud savvy technical learners who need to understand building and operating cost-efficient architectures

## Prerequisites

Attended one of Architecting on AWS, Developing on AWS, or Systems Operations on AWS
