

Managing Google Cloud's Apigee API Platform for Hybrid Cloud

| | |
|----------------|-----------------------------|
| Code: | GCP-API-HYBRD |
| Length: | 3 days |
| URL: | View Online |

This course introduces you to fundamentals and advanced practices applicable to the installation and management of Google Cloud's Apigee API Platform for hybrid cloud. Through a combination of lectures, hands-on labs, and supplemental materials, you will learn how to design, install, secure, manage, and scale Apigee API Platform.

Skills Gained

- Identify the purpose and value of Apigee API Platform
- Gain detailed understanding of Apigee API Platform architecture and recommended practices for topology design.
- Gain detailed understanding of Apigee terminology and logical organizational structures.
- Interact with Apigee API Platform and solve scenarios by leveraging recommended practices.
- Understand capabilities and practices to secure, manage and scale the platform.
- Understand and put in practice installation and upgrade processes.

Who Can Benefit

Cloud Architect, Cloud Engineer and Operation Specialists

Prerequisites

- Familiarity with Linux command and command line interface
- Basic understanding of Google Cloud
- Basic understanding of GKE
- Basic understanding of networking
- Basic understanding of shell script, XML, JSON, HTTP, REST, and TLS.
