- Understand AM and IDM self-service integration

- Explain how data is synchronized between resources

- Describe role-based provisioning

- Understand how IDM uses workflow

- Explain how identity governance provides regulatory compliance

- Describe how to perform a certification campaign

- Run queries to generate identity reports and statistics

Who Can Benefit

The following are the target audiences for this course:

- Evaluators

- System Integrators

- System Consultants

- System Architects

- System Administrators

Course Details

Module 1: Introducing Identity Management Concepts
Describe how identity provisioning solutions automate the provisioning and deprovisioning process:

- Introduce IDM

- Demonstrate the life cycle of an identity

Module 2: Introducing User Self-Service and Registration

Provide customers the freedom to choose how they register for a seamless registration and login process, and manage their profile data:

- Empower users to control their own data
- Simplify user registration
- Explore progressive profiling
- Demonstrate self-registration
- Manage passwords
- Demonstrate password updates
- Manage profile data
- Demonstrate how users manage their account data
- Integrate AM and IDM self-service
- Demonstrate the use of authentication nodes

Module 3: Provisioning and Synchronizing Data

Describe how IDM synchronizes identity data across multiple external resources, and explain how role membership and assignments are used in the provisioning process:

- Understand data synchronization
- Demonstrate data synchronization methods
- Provision attributes based on role membership
- Demonstrate data synchronization methods
- Demonstrate role-based provisioning

Module 4: Integrating Business Processes and Workflows

Describe how to manage and integrate simple and complex identity workflow operations:

- Understand how IDM uses workflows
- Demonstrate provisioning with workflow

Module 5: Introducing Identity Governance

Understand the concepts of ForgeRock® Identity Governance, and how it provides regulatory compliance for business roles:

- Identity Governance overview
- Introduce Access Request
- Demonstrate how to request access to a role
- Introduce Access Review
- Demonstrate how to run a certification campaign
- Introduce Identity Reporting
- Demonstrate Identity Reporting features
