

Aruba ClearPass Essentials, Rev. 20.11 eLearning

Code: ArubaE-CPE-20-11

URL: [View Online](#)

The Clearpass Essentials 6.7 self-paced course prepares participants with foundational skills in Network Access Control using the ClearPass product portfolio. This self-paced course includes both modules and hands-on labs to lead participants through the implementation and configuration of a ClearPass Network Access Control solution. This course is designed to enhance the learner's foundational knowledge in authentication and access control.

- This course is primarily focused on ClearPass, but provides the basics on the device configuration required when considering the interaction between the Network Access Control Device and ClearPass. Participants will learn how to setup ClearPass and configure access control logic within the Policy Manager. Understand how to use ClearPass Guest to configure a convenient yet secure public access network. Participants will explore device profiling, OnGuard endpoint compliance and Onboard BYOD features and configuration. In addition, this course covers integration with external Active Directory servers, Monitoring and Reporting, as well as deployment best practices

Prerequisites

We recommend that students have at least an understanding of basic access layer networking, the function of ACL's and firewall rules.
