

Salesforce - Build System Architect Expertise (ARC-902)

Code: ARC-902
Length: 4 days
URL: [View Online](#)

Dive into the two cornerstone domains of being a System Architect: Integration Architecture, and Identity and Access Management. In this 4-day workshop, our Architect experts will present you with a case study scenario that will be broken down and digested through iterative exploration. Learn how to design and build secure, scalable, and high-performing integration and identity solutions through a combination of lecture, demos, hands-on exercises, and workshop presentations and discussions.

Who Can Benefit

Technical Architect; Architect

Schedule (as of 1)

Date	Location
------	----------

Refer a friend or colleague and get up to \$100 Amazon gift card* — when they book training!
