

Security in Google Cloud

Code:	GCP-SEC-3
Length:	3 days
URL:	View Online

This course gives participants broad study of security controls and techniques on Google Cloud Platform. Through lectures, demonstrations, and hands-on labs, participants explore and deploy the components of a secure GCP solution. Participants also learn mitigation techniques for attacks at many points in a GCP-based infrastructure, including Distributed Denial-of-Service attacks, phishing attacks, and threats involving content classification and use.

Skills Gained

- Understanding the Google approach to security
- Managing administrative identities using Cloud Identity.
- Implementing least privilege administrative access using Google Cloud Resource Manager, Cloud IAM.
- Implementing IP traffic controls using VPC firewalls and Cloud Armor
- Implementing Identity Aware Proxy
- Analyzing changes to the configuration or metadata of resources with GCP audit logs
- Scanning for and redact sensitive data with the Data Loss Prevention API
- Scanning a GCP deployment with Forseti
- Remediating important types of vulnerabilities, especially in public access to data and VMs

Who Can Benefit

- Cloud information security analysts, architects, and engineers
- Information security/cybersecurity specialists
- Cloud infrastructure architects
- Developers of cloud applications.

Prerequisites

- Prior completion of Google Cloud Fundamentals: Core Infrastructure or equivalent experience
- Prior completion of Networking in Google Cloud or equivalent experience
- Knowledge of foundational concepts in information security:
- Fundamental concepts:

- vulnerability, threat, attack surface
- confidentiality, integrity, availability
- Common threat types and their mitigation strategies
- Public-key cryptography
- Public and private key pairs
- Certificates
- Cipher types
- Key width
- Certificate authorities
- Transport Layer Security/Secure Sockets Layer encrypted communication
- Public key infrastructures
- Security policy
- Basic proficiency with command-line tools and Linux operating system environments
- Systems Operations experience, including deploying and managing applications, either on-premises or in a public cloud environment
- Reading comprehension of code in Python or JavaScript

Course Details

PART I: Managing Security in Google Cloud Platform

Module 1: Foundations of GCP Security

- Understand the GCP shared security responsibility model
- Understand Google Cloud's approach to security
- Understand the kinds of threats mitigated by Google and by GCP
- Define and Understand Access Transparency and Access Approval (beta)

Module 2: Cloud Identity

- Cloud Identity
- Syncing with Microsoft Active Directory using Google Cloud Directory Sync
- Using Managed Service for Microsoft Active Directory (beta)
- Choosing between Google authentication and SAML-based SSO
- Best practices, including DNS configuration, super admin accounts
- Lab: Defining Users with Cloud Identity Console

Module 3: Identity, Access, and Key Management

- GCP Resource Manager: projects, folders, and organizations
- GCP IAM roles, including custom roles
- GCP IAM policies, including organization policies
- GCP IAM Labels
- GCP IAM Recommender

- GCP IAM Troubleshooter
- GCP IAM Audit Logs
- Best practices, including separation of duties and least privilege, the use of Google groups in policies, and avoiding the use of primitive roles
- Labs: Configuring Cloud IAM, including custom roles and organization policies

Module 4: Configuring Google Virtual Private Cloud for Isolation and Security

- Configuring VPC firewalls (both ingress and egress rules)
- Load balancing and SSL policies
- Private Google API access
- SSL proxy use
- Best practices for VPC networks, including peering and shared VPC use, correct use of subnetworks
- Best security practices for VPNs
- Security considerations for interconnect and peering options
- Available security products from partners
- Defining a service perimeter, including perimeter bridges
- Setting up private connectivity to Google APIs and services
- Lab: Configuring VPC firewalls

PART II: SECURITY BEST PRACTICES ON GOOGLE CLOUD

Module 5: Securing Compute Engine: techniques and best practices

- Compute Engine service accounts, default and customer-defined
- IAM roles for VMs
- API scopes for VMs
- Managing SSH keys for Linux VMs
- Managing RDP logins for Windows VMs
- Organization policy controls: trusted images, public IP address, disabling serial port
- Encrypting VM images with customer-managed encryption keys and with customer-supplied encryption keys
- Finding and remediating public access to VMs
- Best practices, including using hardened custom images, custom service accounts (not the default service account), tailored API scopes, and the use of application default credentials instead of user-managed keys
- Lab: Configuring, using, and auditing VM service accounts and scopes
- Encrypting VM disks with customer-supplied encryption keys
- Lab: Encrypting disks with customer-supplied encryption keys
- Using Shielded VMs to maintain the integrity of virtual machines

Module 6: Securing cloud data: techniques and best practices

- Cloud Storage and IAM permissions
- Cloud Storage and ACLs
- Auditing cloud data, including finding and remediating publicly accessible data

- Signed Cloud Storage URLs
- Signed policy documents
- Encrypting Cloud Storage objects with customer-managed encryption keys and with customer-supplied encryption keys
- Best practices, including deleting archived versions of objects after key rotation
- Lab: Using customer-supplied encryption keys with Cloud Storage
- Lab: Using customer-managed encryption keys with Cloud Storage and Cloud KMS
- BigQuery authorized views
- BigQuery IAM roles
- Best practices, including preferring IAM permissions over ACLs
- Lab: Creating a BigQuery authorized view

Module 7: Securing Applications: techniques and best practices

- Types of application security vulnerabilities
- DoS protections in App Engine and Cloud Functions
- Cloud Security Scanner
- Lab: Using Cloud Security Scanner to find vulnerabilities in an App Engine application
- Identity Aware Proxy
- Lab: Configuring Identity Aware Proxy to protect a project

Module 8: Securing Kubernetes: techniques and best practices

- Authorization
- Securing Workloads
- Securing Clusters
- Logging and Monitoring

PART III: MITIGATING VULNERABILITIES IN GOOGLE CLOUD

Module 9: Protecting against Distributed Denial of Service Attacks

- How DDoS attacks work
- Mitigations: GCLB, Cloud CDN, autoscaling, VPC ingress and egress firewalls, Cloud Armor (including its rules language)
- Types of complementary partner products
- Lab: Configuring GCLB, CDN, traffic blacklisting with Cloud Armor

Module 10: Protecting against content-related vulnerabilities

- Threat: Ransomware
- Mitigations: Backups, IAM, Data Loss Prevention API
- Threats: Data misuse, privacy violations, sensitive/restricted/unacceptable content
- Threat: Identity and Oauth phishing
- Mitigations: Classifying content using Cloud ML APIs; scanning and redacting data using Data Loss Prevention API

- Lab: Redacting Sensitive Data with Data Loss Prevention API

Module 11: Monitoring, Logging, Auditing, and Scanning

- Security Command Center
- Stackdriver monitoring and logging
- Lab: Installing Stackdriver agents
- Lab: Configuring and using Stackdriver monitoring and logging
- VPC flow logs
- Lab: Viewing and using VPC flow logs in Stackdriver
- Cloud audit logging
- Lab: Configuring and viewing audit logs in Stackdriver
- Deploying and Using Forseti
- Lab: Inventorying a Deployment with Forseti Inventory (demo)
- Lab: Scanning a Deployment with Forseti Scanner (demo)

Schedule (as of 1)

Date	Location		
Dec 15, 2021 - Dec 17, 2021	iMVP	GTR	Enroll
Dec 15, 2021 - Dec 17, 2021	MVP Edison		Enroll
Dec 15, 2021 - Dec 17, 2021	MVP McLean		Enroll
Feb 23, 2022 - Feb 25, 2022	MVP McLean		Enroll
Feb 23, 2022 - Feb 25, 2022	MVP Ottawa		Enroll
Feb 23, 2022 - Feb 25, 2022	MVP Toronto		Enroll
Feb 23, 2022 - Feb 25, 2022	MVP King of Prussia		Enroll
Feb 23, 2022 - Feb 25, 2022	MVP Edison		Enroll
Feb 23, 2022 - Feb 25, 2022	iMVP		Enroll
May 18, 2022 - May 20, 2022	MVP San Francisco		Enroll
May 18, 2022 - May 20, 2022	iMVP		Enroll
